

Steven Cleasby-Mayeda

Corvallis, OR | 503-927-2674 | steven.cleasby.mayeda@gmail.com | github.com/Ancorro | [Portfolio](#)

EDUCATION

Oregon State University

M.Eng. Computer Science (AI Focus) GPA: 3.74

Corvallis, OR

Expected June 2027

- **Relevant Coursework:** Foundation Models, Deep Learning, Optimization for AI, Data Cleaning for ML, Operating Systems II, Graph Theory

Oregon State University

B.S. Applied Computer Science (AI Focus) Major GPA: 3.63

Corvallis, OR

June 2026

- Honor Roll (7 terms)
- **Relevant Coursework:** Machine Learning & Data Mining, Mathematical Statistics, Linear Algebra, Vector Calculus, Parallel Programming, Algorithms, Databases, Reverse Engineering Malware

EXPERIENCE

Waste Treatment Completion Company

Leading Software Engineer (Senior Capstone Project)

Richland, WA. (Remote)

Sep 2025 – June 2026

[Project Page](#)

- Led a team of developers building a Python data-analysis application for safety-critical radioactive waste vitrification calculations at the Hanford site.
- Architected validated calculation pipelines with an emphasis on auditability, numerical consistency, and long-term maintainability.
- Authored comprehensive developer documentation and a handover package ensuring continuity for future maintainers.
- Managed task delegation, code reviews, and interpersonal conflict resolution across the student engineering team.

Forever Sabah

Research Intern

Sabah, Malaysia

Jun 2023 – Sep 2023

- Built data processing scripts for climate raster datasets, analyzing precipitation outlier patterns using QGIS.
- Designed and implemented database schemas for wildlife image datasets supporting individual elephant re-identification.

Oregon State University

Undergraduate Research Intern

Corvallis, OR

Jan 2023 – Jun 2023

- Developed automated data analysis scripts to process, visualize, and extract trend patterns from research datasets.
- Documented methodology and presented research findings at the OSU undergraduate conference.

RESEARCH & PROJECTS

ESM3 Representations for HIV bnAb Modeling | Course *Python, PyTorch, ESM3, LoRA, scikit-learn*
Project

[Project Page](#)

- Built an end-to-end ML pipeline utilizing frozen and LoRA-adapted ESM3 (1.4B param) representations for HIV bnAb breadth prediction on CATNAP (AUROC improved from 0.651 to 0.773).

- Engineered a grouped lineage-held-out cross-validation framework with bootstrap uncertainty estimation to prevent data leakage across biologically related antibodies.
- Trained a categorical VAE on whole heavy-chain sequences for latent-space lineage interpolation, recovering known VRC34 intermediates in 2 of 4 lineage triples.

Parallel Logic Expert with Operator Routing | Course Project

Python, PyTorch

[🌐 Project Page](#)

- Designed and implemented a modular mixture-of-experts (MoE) transformer featuring differentiable fuzzy-set logical operators, learned operator routing, and backbone cross-attention in PyTorch.
- Built a configurable training and evaluation pipeline supporting ablation studies and routing diagnostics, achieving empirical performance gains on logical reasoning benchmarks.

Guidance – Agentic Field Technician Assistant | 1st Place, BeaverHacks 2026

Gemini, Python

[🔗 GitHub Repository](#) | [📺 Demo Video](#) | [👤 Project Submission](#)

- Won 1st place (beginner track, 20 teams) at BeaverHacks 2026, architecting and shipping the full-stack solution in 24 hours.
- Developed a multimodal Gemini agent pipeline integrating image/audio input, transcription, local RAG, function calling, and image editing with QR-scoped retrieval.

Computer Vision – Real-Time Eye Tracking

Python, MediaPipe

- Built a real-time eye landmark extraction application using Google MediaPipe and FaceMesh in Python.

TECHNICAL SKILLS

Best Languages: Python, C

Machine Learning: PyTorch, HuggingFace Transformers, transformer design, training/evaluation, agentic systems, RAG, scikit-learn

Data & Systems: NumPy, optimization, statistics, feature engineering, Linux, CUDA, Docker, Git

Practices: Agile development, code review, technical documentation, testing, ablation studies
